Wireless Battery Powered Probes

The **RxMS** Wireless system is a data logging tool that can be utilized to monitor multiple points in your system, as well as the operating environment surrounding it.

Temperature Probe Specifications:

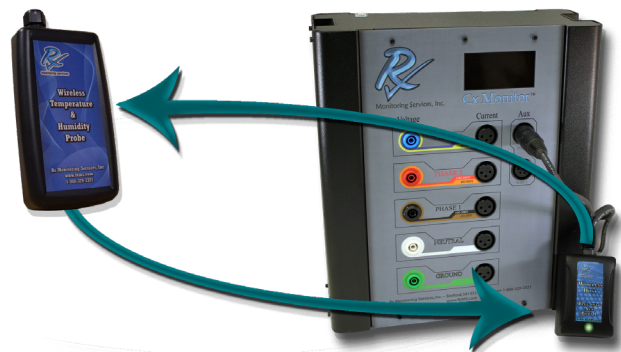

- Range: 0° - 122° Fahrenheit
- Resolution: 0.02° Fahrenheit
- Accuracy: $\pm 5\%$ Full Range
- 1 Reading per log entry

Humidity Probe Specifications:

- Range: 0%-100% Relative Humidity Non-Condensing
- Resolution: 0.03% Relative Humidity
- Accuracy: $\pm 5\%$ Full Range
- 1 Reading per log entry

Additional Product Information:

- Individual log file created for each probe
- Programmable log rate of 4 seconds to 30 minutes
- Max 100 probes per monitor, mix and match probe types
- Range: Indoor up to 100 ft
- Line of Sight up to 1 mile
- Optional external power supply for permanent install
- Battery life between 20wks - 50wks dependant on log rate
- Magnetic backing for easy placement
- "Notes Feature" ideal for identifying and tracking of probes location. (Faster reporting of data)
- Dimensions: 3" x 4.5" x 1.5" (L/H/W)
